A TABLE ON TOP

Select the optimal height-adjustment range

Height of the phyhsiotherapist < 1,85 m.	
the table lifts up to...	and it lowers to ...
93 cm	45 cm

Height of the phyhsiotherapist > 1,85 m.	
the table lifts up to...	and it lowers to ...
101 cm	53 cm

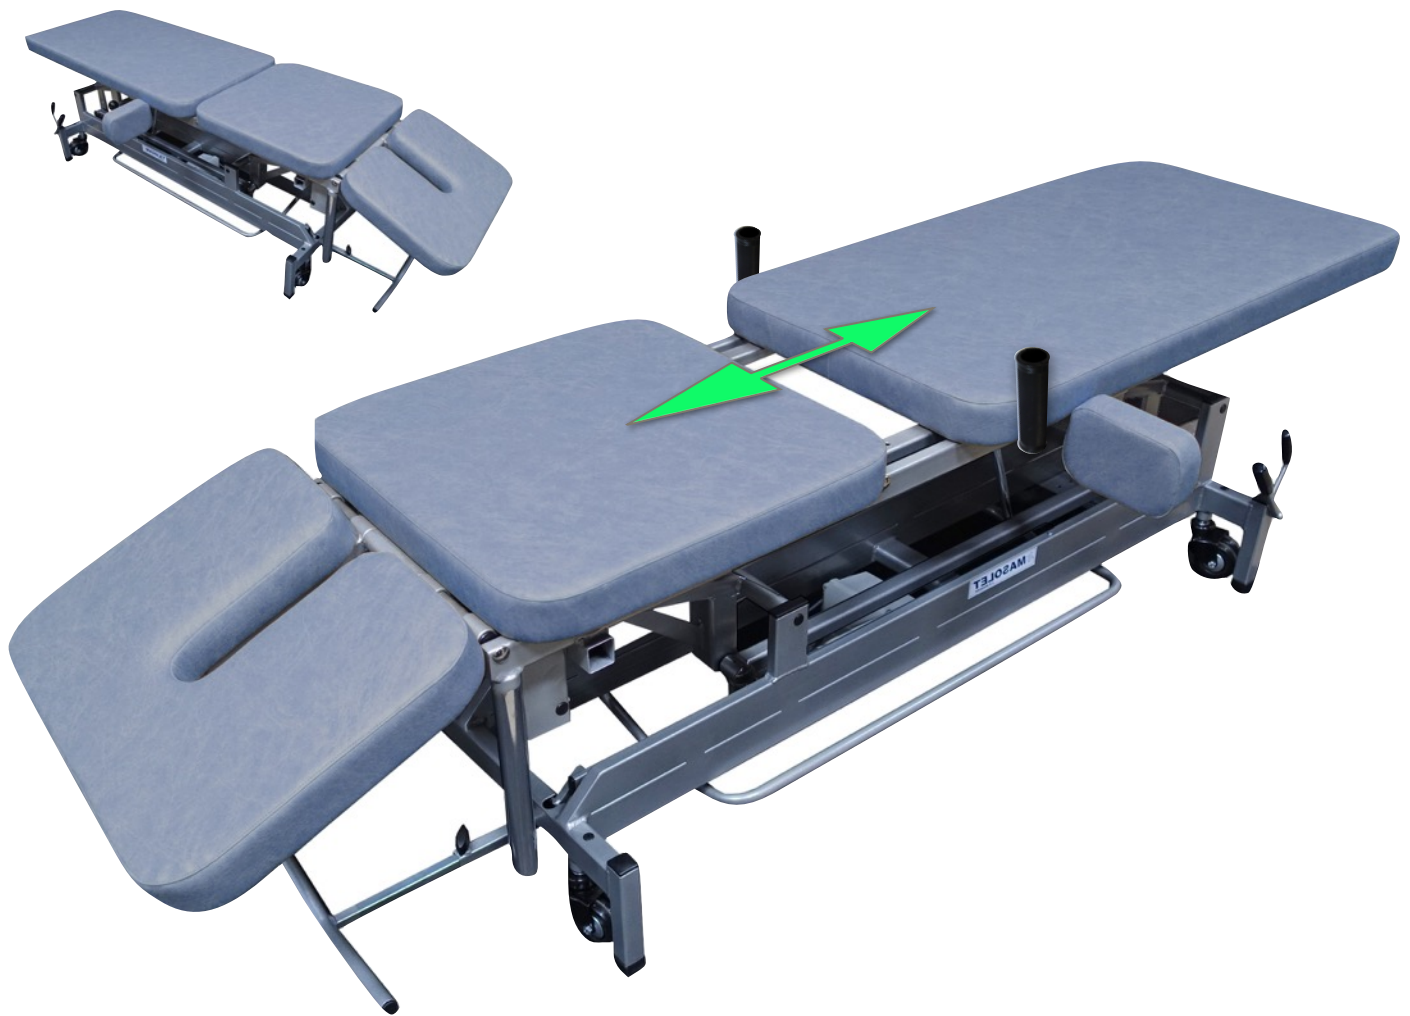

Similarly you can choose the width of the table among the following options.

Width options	
55 cm	62 cm

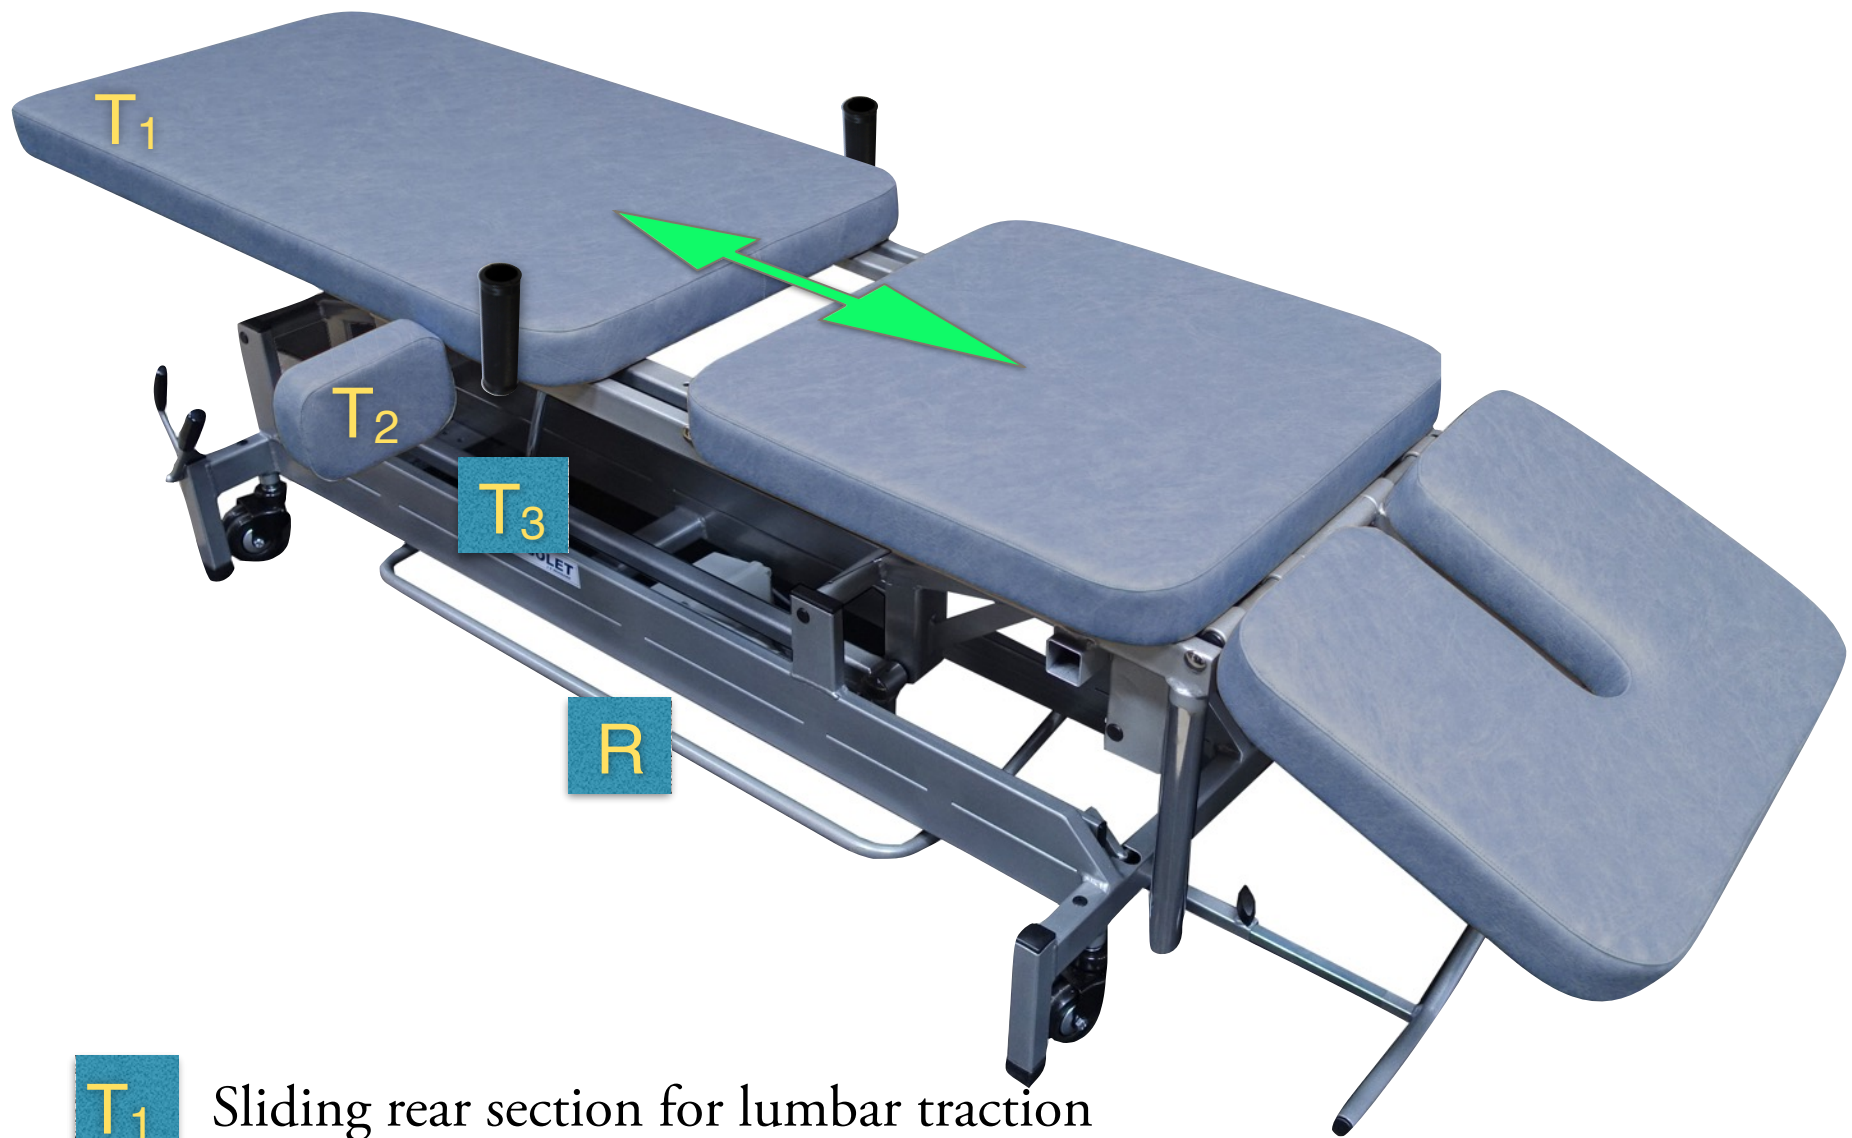

COLORS

You can choose the color you like, order a bicolored table and customize the color of the stitches (no additional cost)

- ▶ The sliding rear section facilitates the delivery of manual traction techniques of the lumbar spine.
- ▶ An elastic system relocates the sliding section simplifying the delivery of the intermittent lumbar traction techniques
- ▶ A special ergonomic support enables the physiotherapist to use her/his body weight to perform lumbar traction effortlessly
- ▶ The sliding section can be fixated in a specific traction position (in 2 cm. steps).
- ▶ The traction handles assist the patient to actively perform auto-traction

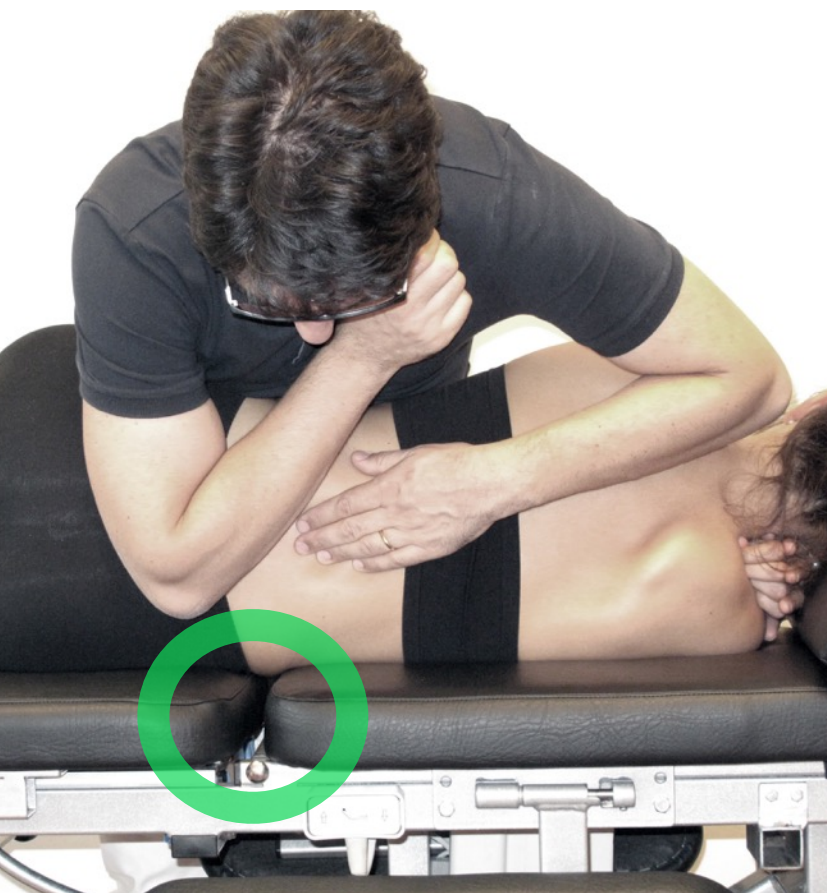

T₁ Sliding rear section for lumbar traction

T₂ Ergonomic support for therapist's waist (to transfer the body weight)

T₃ Grip handles for auto-traction

R Peripheral bar for height adjustment
